

## Bauble 2 – Tuesday 5th December 2017

Yesterday, we made the first star.

Today, we are going to make a second one, and attach it to the first one.

Rounds 1 and 2 are worked exactly as for the first star.

**Round 3:** Work the first point as for the first star. For the second point, work [2 sc, ch 1, 1 sl st, ch 1, 2 sc] in the ch space, inserting your hook through the 3-ch space in one of the points of the first star to make the sl st...

... For the third point, work as the second point, making the sl st in the next 3-ch space in the first star.

Finish the star as the first one.

In the picture, I've put a marker in the first star to make it easier for you to follow along. You can do the same if you like, but it's not strictly necessary

We'll continue tomorrow!
